☰ PROJECTS

DateGo　Date Location Recommended by DateGo App,　DATEGO-V1.0,
> It was a full stack project, which was designed to be available on google chrome through a website. The whole project was to recommend the user the desired location of the place they want to go, based on their interests, budget, availablity and time.
> Later decided to make this as an Application which would be widely available on Android and IOS. As it would be time taking and less efficient to first go and search on google.
